

Air Guard AG-800

The AG-800 is light weight, portable, and easy to use Antibacterial Vaporizer.

The AG-800 is an easy to use sanitizer that is effective in smaller locations like automobiles, office spaces, break rooms, and doctor offices. A quick two-minute warm up time allows the machine to quickly sanitize an area. Operation is as simple as pressing a button on the handle or on an included wireless remote. A built-in 30 second and 5 minute timer allow the user to automatically achieve the best vapor output based on the target area size.

Fogging with the Air Guard FLD or FLE antibacterial solution will form a protective layer on all the exposed surfaces and objects in the room to inhibit bacterial growth.

It can be used as a regular maintenance solution in any place such as cars, buses, houses, offices, houses of worship, theaters, schools, gyms, etc.! It can inhibit most bacteria, fungi, germs, and neutralize bad odors effectively.

Washing your hands diligently and wearing masks in public places isn't enough in our world today, so take the next step in sanitizing your entire space with the AG-800!

Specification

- **Input voltage** US Model : AC 100-120V, 50/60 Hz 6.7A
EU Model : AC 220-240V, 50/60 Hz 3.5A
- **Rated power** 800W
- **Warm-up time** 2 minutes (approx.)
- **Fluid consumption** 10 ml / min
- **Fluid tank capacity** 0.8 Liters
- **Compatible fluid** Air Guard FLD Antibacterial Solution
Air Guard FLE Antibacterial Solution
- **Ambient temp. range** 0°C - 40°C
- **Control** Manual, Wireless control
- **Dimension(mm)** L 315 W 128 H 218 mm
- **Weight** 3.8 KG
